

GIORGIO GRAESAN and Friends	TECHNICAL SHEET	Code	TDS2120_01
	EUPHORIA ORO	Revision	01
		Date	15/04/2024

1. DESCRIPTION

These are **CARRARA MARBLE grits bonded with resins and SEQUINS**, which give the product strong and eye-catching light reflections with a **GOLDEN** effect.

2. USE

EUPHORIA is suitable for decorating various types of interior wall surfaces. It is easy to apply with the KIT/I stainless steel spatula.

3. PREPARING THE SUBSTRATE

Proper substrate preparation is essential for a successful finish. Remove any loose or flaking paint or plaster, taking care to wash or brush off any mold or dust. Before applying PRIMUS NATURALE, the surface must be well bonded. If not, apply an insulating primer, which is especially recommended for plasterboard walls.

In the case of application on tiles, after degreasing the wall with denatured ethyl alcohol, smooth any large joints with a first spot grouting of PRIMUS AGGRAPPANTE, leave to dry, then apply a coat of PRIMUS AGGRAPPANTE using a KIT/I stainless steel trowel, evenly and smoothly.

4. METODO DI APPLICAZIONE

EUPHORIA is ready to use. First, color by pouring the previously mixed COLORING ADDITIVE in the quantity indicated in the catalog and mixing until the color is completely homogenized, taking care not to leave any uncolored product on the bottom or sides of the can.

Apply in one coat with the KIT/I stainless steel spatula. Periodically return to the same coat to even out and compact with KIT/NUDO, smoothing lightly and spraying a little water to make the trowel slide more easily. To eliminate any residual flakes, apply a coat of VETRO LUCIDO after 24 hours, using a PE 13 roller.

To increase durability and washability, EUPHORIA can be protected with IPERVETRO, using a PE 13 roller. Once the product is vitrified (after 24 hours), be sure to lightly sand it by hand with 80-grit sandpaper to remove any raised and sharp glitter flakes.

5. CLEANING THE TOOLS

Clean the tools with water immediately after use.

6. PROTEZIONE E PULIZIA

With the addition of a coat of VETRO LUCIDO and/or IPERVETRO, EUPHORIA is water-repellent and completely washable. o clean walls, we recommend using LATTE DETERGENTE (diluted 50 ml in 1 litre of water). Alternatively, you can also protect it with IPERVETRO.

7. SAFETY RECOMMENDATIONS AND RISK IDENTIFICATION

The product does not require labelling according to current regulations. Use the product according to current health and safety regulations; after use, do not dispose of containers to the environment; let residue dry thoroughly and handle as special waste. Keep out of the reach of children. If swallowed, seek medical advice immediately and show this container or label. Do not empty into drains, waterways or soil.

TECHNICAL CHARACTERISTICS: APPLICATION	
Dilution	Product is ready for use
Mixing	Always mix before use
Colouring	GOLD based
Tools	KIT/I stainless steel spatula and KIT/NUDO trowel
Primer	PRIMUS NATURALE
Conditions of application	From +10°C to +35°C with relative humidity < 85%
Number of coats	1
Curing time	24 hours at 20°C
Protecting	VETRO LUCIDO and/or IPERVETRO (one coat) with PE 13 roller
Washability	Good washability. Full wash with LATTE DETERGENTE if protected with VETRO LUCIDO and/or IPERVETRO

TECHNICAL CHARACTERISTICS: COVERAGE	
PRIMUS SABBIA / PRIMUS NATURALE	6 – 7 m ² /litre
EUPHORIA ORO	1 m ² /kg
VETRO	7 – 8 m ² /litre

TECHNICAL CHARACTERISTICS: PRODUCT	
Composition	Carrara marble chips, acrylic copolymer in aqueous emulsion, additives, fillers and prismatic fragments
Specific weight	1.25 ± 0.05 Kg/litre
pH	8.0
EU limit value (Directive 2004/42/EC) Cat. A/l: decorative effect coatings (water-borne): 200 g/l	Maximum VOC content 0.00 g/l
Storage conditions	Keep in tightly sealed container, even after use and after cleaning the sides and lid of the tin, in a cool, dry place at temperatures between +5°C and +30°C
Packaging	4 – 8 kg
